SUMMARY

Detail-oriented professional with 7+ years of experience driving digital product success across the full product lifecycle. Expert at translating complex business requirements into user journeys, information architecture, wireframes, interaction designs, and high-fidelity prototypes for web and mobile platforms. Leverages a hybrid background in project coordination and front-end development to ensure designs are user-centered, technically feasible, and aligned with business objectives.. Skilled in leveraging AI-assisted design and prototyping tools (e.g., Loveable, Cursor, Figma Make, Google Stitch etc) to accelerate prototyping, reduce iteration cycles by up to 30%, and deliver scalable, user-centric solutions.Experienced in collaborating with cross-functional teams in Agile environments to deliver scalable, innovative, and engaging digital experiences.

EXPERIENCE

Accenture

Bengaluru

User Experience Arch Specialist

May 2026 - Present

- Leading UX for a large-scale California government public service portal, one of the state's major digitalisation initiatives from legacy paper-based process into a scalable platform. We define the structure, user flows, and interaction logic of the platform.
- Lead UX delivery for a team of designers, setting design direction, reviewing deliverables, and unblocking work to maintain quality and consistency across workstreams
- Guide the team in adopting AI-assisted UX workflows (Claude, Figma Make), cutting prototype turnaround from days to hours and building team capability
- Accelerate backlog refinement by ~30% through a wireframe-first approach, achieving on-time delivery in an Agile/Scrum environment
- Partner with Business Analysts and Product Owners to align on scope, priorities, and acceptance criteria early, reducing post-refinement rework by ~25%
- Designed user journeys, process flows, and information architecture covering multiple user personas, edge cases, and complex system logics
- Established a comprehensive UX framework, standardizing design patterns and component libraries to ensure cross-platform consistency and accelerate future development cycles for public-facing digital services.

Fingent Global Solutions

Kochi, Kerala

Project Coordinator & UX Analyst

December 2023 - February 2026

- Led the 0-to-1 digital transformation of CMFRI's legacy paper-based survey into a scalable platform, managing cross-functional delivery under strict timelines to achieve 100% digital adoption and seamlessly onboard over 1M+ data records for a massive user base.
- Owned the user-centric requirements gathering process, translating complex customer pain points into clear user stories, UX workflows, and functional specifications within Agile frameworks.
- Managed and prioritized the product backlog with a focus on user value, balancing feature delivery and scope changes with development timelines while ensuring the core UX vision remained intact.
- Acted as the primary bridge between design, engineering, and clients, protecting the user experience by ensuring cross-functional alignment on product vision and strict adherence to UX acceptance criteria.
- Directed the end-to-end design lifecycle, producing user journeys, information architecture, interaction models, wireframes, and high-fidelity mockups to support intuitive, seamless user interactions across complex digital workflows.
- Evaluated and proposed technical and design solutions, leveraging open-source technologies to solve usability challenges while optimizing both delivery efficiency and the final user experience.
- Collaborated with analysts across survey design, A/B testing, and contextual inquiry studies, translating research findings into actionable design decisions that resolved unresolved UI issues and informed iterative improvements to user journeys.
- Leveraged and drove adoption of AI-assisted design and development tools (e.g., Loveable, Claude, Cursor, and other LLMs) to rapidly prototype product concepts and applications, establishing structured prompting workflows that enabled teams to generate production-ready UI components and functional application prototypes..

- Used and Leveraged AI-driven prototyping tools (Figma Make, UX Pilot, and Google Stitch) to reduce time-to-prototype by 30–50%, accelerating product validation while maintaining high UX and design quality.

CISAI, Amrita Vishwa Vidhyapeetham

Kollam

Developer

August 2018 - December 2023

- Spearheaded the intersection of Front-End development and UX design, combining expert UI implementation with ownership of user experience strategy and product design.
- Championed the transition to a UX-led SDLC, upholding user-centered design principles and iterating quickly to improve consistency of design language and experience across the product suite directly enabling the onboarding of major enterprise clients.
- Collaborated with cross-functional engineering teams to translate static designs into production-ready UI by utilizing reusable component libraries, ensuring technical feasibility while streamlining development cycles to reduce feature implementation time by 20%.
- Supported the maintenance of internal design standards by establishing consistent style guidelines and UI patterns to ensure visual consistency and streamline development across multiple SaaS products.
- Engineered responsive, high-performance dashboards for complex cybersecurity workflows, simplifying multi-layered data sets into intuitive user journeys for government and enterprise stakeholders.
- Partnered closely with backend teams to integrate RESTful APIs, ensuring end-to-end functionality while maintaining a strong focus on front-end performance and scalability.
- Supported product strategy by managing the design roadmap within Agile/Scrum environments, ensuring UI components were scalable, maintainable, and aligned with business goals.
- Conducted iterative prototype testing and contributed to heuristic evaluations to identify usability friction points, refining user journeys based on feedback from developers and end users.
- Produced structured experience maps, sitemaps, interaction models, wireframes, and detailed design specifications to support iterative design, cross-browser testing, and engineering handoff ensuring smooth implementation of designs.
- Led interface design and front-end logic for award-winning security products, recognized by the DSCI Excellence Award (2022) and OSPA India (2023), aligning technical execution with business objectives.

Arbion Infra Services

August 2017 - August 2018

CMS Support Engineer

- Managed critical Content Management System (CMS) operations for South Indian Bank, ensuring 24/7 technical support and system uptime.
- Collaborated with cross-functional technical teams to resolve software glitches and maintain database integrity for banking applications.

EDUCATION

B.Tech, Computer Science and Engineering

Kollam, Kerala

Minor in Mathematics • Amrita School Of Engineering • 6.02

2012-2020

SKILLS

UX Design & Strategy : User Experience (UX) Design, User-Centered Design (UCD), Design Thinking, Information Architecture, User Personas, User Journey Mapping, User Flows, Wireframing, High-Fidelity Prototyping, Interaction Design, Usability Testing, UX Optimization, Responsive Web Design, Mobile-First Design, Visual Design, Scalable Design Systems & Component Libraries, AI-Assisted Design, Technical Feasibility Assessment, Salesforce.

Front-End Development : HTML5, CSS3, JavaScript, React (working knowledge), UI Implementation, Responsive UI Development, Cross-Browser Compatibility, Cross-Device Testing, Front-End Debugging, Salesforce.

Product & Agile Delivery : Business Analysis, Requirements Gathering, Requirement Documentation, User Stories, MVP Definition, Roadmap Planning, Product Strategy, Market Research, Competitor Analysis, Stakeholder Management, Agile/Scrum Methodology, Sprint Planning, Backlog Refinement, Cross-functional Collaboration, Lean UX Practices

Tools & Technologies : Figma, Balsamiq, Adobe XD, Jira, Confluence, Visual Studio Code, Git/GitHub, Bootstrap, Adobe Photoshop, Adobe Illustrator, CanvaAI & Design Tools: Cursor, Claude, Loveable, Figma Make, Google Stitch, MCP , Figma Connect
